Exercise 2.

1. COUNT() Function

SELECT COUNT(*) total number employee
FROM employee table;

total employees
10

2. SUM () Function

SELECT SUM (Salary)
FROM employee table
WHERE department 'IT';

total-it salary
220000

3. AVG () Function

SELECT AVG(Salary) AS Avg_hr_Salary
FROM employee table
WHERE department 'HR'.

Avg salary-HR
49500

4. MIN() and MAX functions

SELECT MIN (Salary) AS "lowest_salary,
MAX (Salary) AS "highest_salary
FROM employee table;

Lowest Salary	highest Salary
48000	62000

5. GROUP BY Statement

SELECT department,
SUM (Salary) AS tot Salary
FROM employee table
GROUP BY department;

Department	tot_Salary
Finance	119000
HR	99000
IT	220000
[illegible]	[illegible]

Scanned with CamScanner

6. Group By and Count(*)

SELECT city,
COUNT(*) As no_employees
GROUP BY city;

city	no_employees
Chicago	3
Houston	1
Los Angeles	3
New York	3
San Francisco	2

8. GROUP BY and ORDER BY

SELECT department,
AVG (salary) As Avg_salary
FROM employee table
GROUP BY department
ORDER BY avg_salary DESC;

Dept	avg_salary
Finance	59750
IT	5500
Marketing	52500
HR	49500

Having Clause

SELECT ~~AVG~~ (salary)
FROM ~~employee_table~~
~~WHERE~~

SELECT department
SUM(salary) As total_salary
FROM employee table
Having SUM(salary) > 100000;

9. Combining GROUP BY, Having and order by

SELECT city, COUNT(*) As employee_count
Having COUNT(*) > 1

7. Combining AGG functions

SELECT department, AVG(salary) As AVG_salary
FROM employee table
GROUP BY department
ORDER BY department

Dept	AVG_salary
	59500
